

May 16, 2010

Eric Callisto
Chairman
Public Service Commission of Wisconsin
610 North Whitney Way
Post Office Box 7854
Madison, WI 53707-7854

Dear Chairman Callisto,

RE: Please register this as a formal complaint

Allow me to draw your attention to the following.

Mrs. Liv Moyer is a resident who lives in the Cedar Ridge Wind Project with her husband and children. Although all members of her family are not experiencing the same effects, Mrs. Moyer has been experiencing severe sleep deprivation from a hum and vibration that appears to be associated with the nighttime operations of wind turbines near her home. Mrs. Moyer has sought medical treatment.

While feeling neutral about the wind project initially, Mrs. Moyer feels the true impacts of the wind turbines were not disclosed clearly.

Mrs. Moyer has followed what she was led to believe was the proper complaint process. She has contacted Alliant Energy and PSC staff members on innumerable occasions spanning over 18 months. Mrs. Moyer has had no resolution to her problem. Mrs. Moyer has additionally contacted the Fond du Lac County Health Department, as well as the State Department of Public Health.

I respectfully ask you to immediately investigate Mrs. Moyer's case and respond to her directly. The impacts of the hum and vibration have severely affected her quality of life.

Sincerely,

Cathy Bembinster
Healthy Wind, Wisconsin, on behalf of:
Mrs. Liv Moyer
N5600 Pine Road
Eden, WI 53019

 Subject: Wind Turbines near our home

Hello Family and Friends!

I want you all to understand what the Wind Turbines are doing to families who are located TOO CLOSE. I have attached two files of studies that are true since I personally am experiencing most symptoms. Also take a moment to look at www.windturbinesyndrome.com <<http://www.windturbinesyndrome.com>> - it is eye opening - I am not the only one feeling the effects - it is all over the world!

I am also including a video of the inside of our home - the shadow on/off is called the flicker.

In 1996 my husband and I had the opportunity to purchase our property of 35 acres to build our dream home a few years later. We were required by the Town of Empire to purchase the 35 acres in order to

build our home. Both of us grew up in the country and appreciate the peacefulness. I am sad to say today I wish our dream hadn't come true. I feel betrayed by our township, fellow land owners and by our country.

I haven't had a decent night sleep since last November when the wind turbines were turned on. This spring when we are able to open our windows, we won't be able to. I stand outside even now at night when I get home and it truly sounds like I am at O'hare airport. I can feel the vibrations in my bed at night along with the noise. Our television has needed to be rewired, our local channels weren't working so Alliant came in and installed DishNetwork - this is a temporary fix for two years - then it is up to us. The TV still is a problem, sometimes the sound isn't working or the picture doesn't even come in.

My children have noticed not being able to sleep, I have noticed the dogs don't care to be outside for too long in the evening. I guess no more camp fires in the country this summer. We have seen the beginning of flicker in our home - for about an hour right now at 6:00 pm our home has been turned into a disco with the shadow from the blades - off/on... So again I will feel like a prisoner in my own home. We will have to put heavy curtains on the windows so we can't see out.

Our tax assessment went up this past year, farm land has gained in value. I wonder why? To many wind turbines taking up the farm land. I know if we even tried to sell our home - it isn't saleable - this is a term the appraiser used. The turbines don't affect our value but our sale-ability - does that make sense???

I am for renewable energy but why so close to peoples homes? Why our homes, why not out in the ocean, deserts or maybe in someone else's back yard?

Wisconsin is the third highest taxed state in the United States, where is all our renewable energy money going - not to the poor schlups who live near these Wind Turbines. Our taxes have steadily gone up each year. When I grow old enough to retire I will move from this place to somewhere peaceful - that is if I can grow old.

The next time you take a drive to the country and say how beautiful the Wind Turbines are - pull over, turn your car off, get out and listen. I know I can't hear the crickets or the frogs anymore! I can't even hear the horses next door playing in the pastures.

Totally crazy! Sorry for the rant - just want you all to understand the consequences of letting these go up too close to peoples homes.
Liv

To: bob@thewelchgroup.org
Subject: Wind Turbines
Reply-To: liv@setinink.com

Hi Bob,

My husband is Tony Moyer - I asked him to give me the addresses of the people against the wind turbines.

We have three within 1000 feet of our home and I have had sleeping issues, I feel vibrations in our bed at night and the turbine people say they have never heard of these problems.

My problem is the people who are for the turbines live no where near them and don't understand the health issues it causes for some people.

I'm also experiencing dizziness and will be going through medical testing to see what is wrong.

I have spoken to my Ear, Nose and Throat dr about my theory and he agrees that there is a possibility the vibrations are causing my symptoms. So after thousands of dollars in medical bills we hopefully will have an answer.

I would like to do something and feel like I am a minnow in the Atlantic ocean. Please let me know how I can help in this up hill battle!

Thanks for this information. Please report your problems to the county public health department as well (this is just for public documentation, as your doctor's information is private). Also share with your doctor that there is research by Dr. Nina Pierpont regarding wind turbine syndrom - symptoms very similar to yours.

Also you should write to the PSC and to your legislators – perhaps after the doctor confirms your problems. This will help us add all the minnows together to make a difference!

Subject: Vibrations & Television

Hi Kellee,

First of all the blinds have been helping with the flicker – even though it feels like I could move my house now in the middle of the city and it would be no different.

Our TV has been nothing but a huge problem, we have had to have the receiver that supplies 3 tv's replaced and it is now not working. We have had problems with our remote in our room since the receiver is in the basement it doesn't work well when someone is using the basement tv.

Dish Network has terrible reception when it just sprinkling out, we never had problems with Direct TV unless the weather was a tornado

And my final problem that I'm not going to give up on - EVER! I can't sleep - this morning I was woken up at 4:00 am from the vibrations of the turbines.

I know I'm not crazy because there are other people out there who have the same problems. It seems worse when there is little to no wind and the generators need to run harder.

The vibration problem needs to be taken care of - not sure how but needs to be resolved.

Thanks,
Liv

I will get your email onto my cell so I can send from it when I don't sleep every night. Here is my message from last night. I was able to fall back to sleep at about 3:30 am and woke up at 5:30 so I basically had 4 hours of sleep. Just unbelievable! I am going to be so CRABY today, and I have at least a 12 hour day at work. I may just sleep here - I can turn every thing off and NO VIBRATIONS..... wow what a concept.
Yeah.

Hi Kellee,
I'm forwarding this email since I don't have you email on my cell. But as you can see the vibrations are very irritating to me and my sleep is being disrupted. I'm now at this moment trying to get my body to stop shaking and trying to sleep on our couch on the main floor. I don't

know about you but I have always been a person that needs my sleep. I'm concerned that after ten years of this, it (the turbine vibrations) will drive me crazy or very sick. I know for a FACT that I'm not the only one with this problem. I will keep emailing since it will be my best defense for my family when they need to seek financial help from all this bullshit.

I better go so before I say anything worse. Just this isn't much fun and I don't know about you, but if you were in the same position what would you do. I feel totally ignored and a prisoner in our own beautiful home.

Kellee,

I haven't heard from anyone about the noise and vibrations that we have been having. I'm trying to fall asleep this evening and it feels like I'm in a noise tunnel and my bed is just like one of those vibrating beds at a cheap motel, I may get a more rested night of sleep if I stayed at one. Ill let you know how it goes this evening - it sure was a beautiful thing and peaceful when I came home from work today at 7 pm and it was silent out here - absolutely zero movement.

Please let me know your solution!!! If you would like to buy our dream home that would be great!

Hi Kellee and David,

Just wanted to email you to let you know they have been worse than normal lately. I have been having to take over the counter sleeping pills to get through the night. The feeling I get in bed is like when you have the radio turned up real loud in your car and you can feel the vibration from the music - this is exactly what I am feeling while I am trying to sleep. Below is one of the evenings I woke up.

I wanted to thank you for another unbelievable night of not so rest for me.

I slept from 10:30 pm and woke suddenly at Midnight to not fall back to sleep until 2:30 am and then woke again at 3 am to feel the bed under me vibrating so bad it felt like there was an earth quake.

Can't move since our home is not "saleable" according to our Appraiser, I actually LOVE my husband and like sleeping in the same room with him - so it is not an option for me to sleep in a totally different room.

Again thanks for listening.....

Thanks again - trying to sleep amongst the Wind Turbines!

I have to say the for about 3 nights they have finally quite and last night they have that hum and vibration I have come to hate. Sure wish it didn't affect me but it does! Of course it doesn't matter the wind turbine people who don't care about people - they do all the studies how the would affect animals! The people who are for these things need to live by these things so they can realize how they have affected my quality of life!!!

Subject: Wind Turbines - I am NOT alone! Yeah!!!!

Hi Kellee and David,

First I want to say waking up this morning at 3:00 am is such a great benefit of now living in such a Green world and it has become so "people friendly" - not.

Anyways, I spoke to Jim Lepinski from the PSC of Wisconsin and he directed me to a public document concerning the Glacier Hills Wind Park proposed for Randolph area. I am attaching the pdf - it is a great read! I am not nuts there are people out there with the same problems I am having with not sleeping and how they have been affected and their quality of Life. I do think it is unfair the Bats and Avian are studied for TWO years to see how they are affected but yet people have a sound study for 14 days, 10 minute intervals three times a day - wow! The human race could die tomorrow and I think the environmentalists would be happy...

I will keep plugging away each day to find someone who will listen to me and how the Turbines affect the Quality of Life for HUMANS.

As you can see the sleep deprivation has affected my tolerance for anything these days.

Thanks again for "listening"....

Hello Everyone!

Just would like to update you on this past weekend and how well I slept on Friday evening, woke up on Saturday morning and really was happy I couldn't even see the Turbines! There was no noise, no motion on Friday evening. On Saturday Evening it wasn't bad either - gotta love the foggy days!

Last night was a bummer... put my head on my pillow and all I heard was the annoying HUM, ended up having to put my iPod in my ears... I am irritated all the time and my whole body aches - but of course we don't 'STUDY' the effects the Turbines have on people... Believe me they do have an effect on people - I KNOW I am experiencing them!

This sucks and trying to rest in my own home!

Subject: Turbines

I invite all of you to PLEASE spend a few hours in my room lying on my bed. The sound of the turbines is just a constant grind on my senses. I guarantee you would be able to "quantify" what I am hearing. I very rarely get to have free time to enjoy spending it in my room, today I get a few hours and this is the crap I get to listen too. This has affected me and my life. If I had to go through chemotherapy now (I am a breast cancer survivor of over 4 years) there is absolutely no way I would be able to rest in my own home cause the noise is so unbearable!!!! So you better pray I am never diagnosed with breast cancer again because I will have nothing to loose. The turbines are driving me insane, unhappy, bitchy, negative towards life. You have made me realize humane life and the affects the turbines have on people just doesn't matter it is all about the money! Otherwise you would atleast try to solve the problem I am having. I'm just a bleep and you could care less.

Thanks again for your concern and the lives that are being affected!

Subject: Wind turbines

The turbines turned on for the first time in the past week. I can't believe how much the grinding hum of it is driving me nuts and just constantly grinding away at my nerves while I try to relax and fall asleep. I really don't know how much of this crap I can take. These t past few days without them on I have not noticed them and I have just enjoyed being here! I just absolutely love my home but am just so pissed off these things have made something I enjoy so much - SUCK.

Sorry to vent to you. But someone needs to hear what I have to say since the PSC doesn't listen and neither does the wind farm people!

Why don't they just try living with this noise sometime. I give them a week - except they know they don't have their entire life savings tied up in it and they can go home and leave this crap. I guess I could live with it for a week too.

Liv:

We have a meeting arranged for early next week with WP&L regarding your concerns. I will be in contact with you afterward to let you know the results. At this point, my inclination is to have WP&L do some additional noise and vibration monitoring at or near your residence, to try to isolate the source of the noise.

I know you are anxious to reach some sort of resolution on this, but just wanted you to know that we are working on it.

If you have any other questions, please contact me.

Just checked Facebook and both my children posted neither one of them could sleep. I wonder why? I'm having the same problem - turbines. This has affected my children but I guess that doesn't matter. Human life has absolutely zero rights in this country anymore. No consideration

for the peons in rural communities - guess no ones listening. The only way someone would listen to what I'm saying if I had a pile of money and actually had political influence.

Thanks for listening and not caring!!!!!!!

I feel all wind farm employees should be required to live within the wind farm. That way there would be no issues since all wind farm employees believe these industrial machines belong in the country, and they supposedly don't affect anyone!

Problem solved! Now if I actually was a person with millions of dollars and influence - Alliant and the PSC would maybe care. But my little life is meaningless!!!

Dave, I almost feel guilty being in Texas. I got a great night sleep as well as my kids did. Liv is stuck trying to sell our once dream home (before the turbines) and yet we keep asking(with no reply from you) what are you going to do? Still nothing, as we now try to sell our home because of your lack of concern or caring. You are probably planning some other wind farm with no regard to anyone else life savings which is there home. I have asked you repeatedly to shut off the turbine to the west of our home at night. Still nothing from you as of a reply. I know you could care less and won't respond to this or do anything to fix this. So I hope something destroys your life dreams and possibly your family so you can feel how we do. You and your company should be embarrassed of your actions.

Trying to sleep in my bed in my room.

How are you going to fix this problem?

Just want to say. I remember a time when it was windy there was just wind noise. Now when it's windy it's the wind and these VERY large FANS amplifying the wind and making it even louder. THIS SUCKS!!!

Looking forward to another crappy night of sleep. Thanks for thinking about us humans. If I had a sleeping pill here I would take a couple and still use my iPod.

Dear Karen Timberlake,

First I would like to say how hard my husband and I have worked our entire life to be able to own a home in the country on 35 acres - only to find out the Wind Turbines can come in and disrupt our lives. We purchased 35 acres almost 15 years ago (it was required at the time by the township) and built our dream home. My husband built it! We all worked on it as a family. My husband and I both grew up in the country so we only know the peace and quiet that goes with living in the country.

After 10 years of quiet we were told the Turbines were going to be built, we were also told they would be quiet and under 50 dba. At the time I thought that was good - we didn't have an opinion about the Turbines. After having been exposed to them for over a year and half - I have a different opinion. They have affected my life and how I am NOT able to sleep. People have no clue until they actually are forced to live near these industrial wind turbines. I have lost much sleep, it has affected my life, I am more irritable, my body aches all the time.

I have had absolutely NO response from Alliant Energy about the Turbine Noise and vibrations. I have also spoken to the PSC - I truly believe NO one cares about humans and would rather see the Earth be free of us! I have contacted Fond du Lac County Health Department - they have no idea how to handle this. No one can help me, I am concerned about my health! I am the only one who is concerned about my health!!!!... I am concerned about how they have affected our value of our home and how they have affected my children! But yet NO one is listening. I have invited Alliant Energy employees to come, stay at our home. Feel what it is like at night when you try to sleep within an industrial park.

I have included emails dating back to August of 2009, I only started documenting my sleeplessness nights in August. The Turbines went online in November of 2008 and have affected my sleep since then!

Looking forward to hearing from you and what your solution is to this difficult health issue!

Liv L. Moyer
N5600 Pine Road
Eden, Wisconsin 53019

Dear Ms Moyer:

Thank you for your April 23, 2010, letter to Secretary Karen E. Timberlake regarding your concerns relating to noise from wind turbines near your home. Secretary Timberlake has asked me to respond to your letter on her behalf and I welcome the opportunity to do so.

As you know, there is a great deal of interest in the expansion of wind energy projects throughout the state. As the state's public health agency, my staff has followed the development of the wind energy conversion industry in Wisconsin over the past decade. In a number of cases, our agency has been asked to respond to concerns raised in inquiries from local public health agencies and other stakeholders seeking information about health issues relating to wind energy projects in Wisconsin. As such, I appreciate your willingness to share your concerns with us.

We have reviewed the available scientific literature on wind energy projects and public health, as well as reports issued by the National Academy of Sciences and other state health departments. Based on this review, the Division of Public Health finds no clear scientific evidence to support the conclusion that wind turbine development using existing setback criteria would result in specific adverse health impacts to the public.

In discussing this topic with local health officials in Fond du Lac County and other counties where wind energy projects have been undertaken, the majority of complaints received regarding current wind energy projects have been related to nuisance issues that have not generally been amenable to local health agency action. In your letter, you included a series of e-mails in which you recorded your concerns about the impact that noise related to wind turbines was having on your health. We have previously received a few reports of individuals who reported sleep disruption they attributed to wind turbine noise. While we cannot rule out the possibility that noise related to wind turbines may be a factor in the sleep disruption you describe, we also realize that there are often many factors associated with sleep disruption. It is our position that individuals with sleep disruption from any cause, whether attributed to wind turbines or other factors, should first seek evaluation by a medical provider.

Liv L. Moyer
May 6, 2010
Page 2

It is clear that gaps remain in our collective knowledge of how wind energy conversion projects may affect the communities in which they are implemented. As affected individuals are evaluated by medical providers, this will allow for complaints to be linked with objective clinical data, and help improve our understanding of the relationship between wind energy and health. Because the development of wind energy projects is an area of significant growth in Wisconsin, it is important that we continue to look for ways to minimize potential impacts to neighbors. To the extent that this impact falls into the public health realm, our agency will continue to seek data and information to guide public policy on this matter.

If you have any further questions or concerns, please feel free to contact Chuck Warzecha, Director, Bureau of Environmental and Occupational Health at 608.264.9880.

Sincerely,

A handwritten signature in black ink that reads "Seth Foldy" followed by a stylized flourish.
